***Particle and Fibre Toxicology* is an open access, peer-reviewed, online journal for new scientific data, hypotheses and reviews on the toxicological effects of particles and fibres; it functions as a forum for scientific debate and communication between toxicology and disciplines that develop (nano)particles for future applications. These include material sciences, and applications in nanomedicine, such as drug delivery and imaging.**

Particle and Fibre Toxicology is a multi-disciplinary effort because of the need to understand the physico-chemistry of the particles, measure the exposure, determine the biological outcomes in terms of human exposure and regulate exposure in the workplace and general environment.

The journal considers the following article types: research articles, commentaries, letters to the Editor, reviews and short reports. For further details, see www.particleandfibretoxicology.com/info/about/.

Reasons for publishing in *Particle and Fibre Toxicology*:

- All articles published in the journal are open access; universally accessible online without charge.
- High visibility for your work - anyone with Internet access can read your article, free of charge.
- Included in PubMed - making your work easy to find, read and cite.
- Articles are published immediately upon acceptance.
- Authors retain the copyright of their articles.
- Electronic submission and peer-review makes the whole process of publishing your article simple and efficient.
- Publishing online means unlimited space for figures, extensive datasets and video footage.
- Professional formatting meets the standards expected by researchers.
